

Indestructible!

Just feel it. The rubber sheeting is elastic and strong at the same time. No risks with seams and it can be laid without difficulty. Do you want a round pond? No problem. The VB Fishpond rubber sheeting can be supplied in any shape and size...in one piece!

You want to do it yourself?

No problem with the VB Fishpond rubber sheeting, as the material is so flexible that you can always lay it perfectly in the right shape. If the earth has been dug out in the right way, the pond liner falls into place immediately. It fits like a glove!

If you prefer, your garden or pond specialist will do the job in no time. Ask the specialist below and he will lay the pond practically free of creases, in the required shape and size, and in a fish and plant friendly manner. Hardly any more maintenance is required and you can enjoy the pond of your dreams for years without a second thought!

VB fishpond Exclusive!

**VB Fishpond sheeting
for every
dream pond!**

VB FISHPOND
SYSTEM IM GUMMI

Elastic rubber sheeting

A pond in your garden is pure enjoyment. Whether you decide on an ornamental pond with water lilies, a swimming pool or a streamlined pond. A dream pond for you and an extra dimension for nature.

A pond gives your garden the finishing touch

A natural pond gives your garden that little bit more. It is restful, dynamic and relaxing at the same time. You will be intensely aware of your garden! The pond evokes a fascinating ambience that cannot be achieved in any other way. It is an eye-catcher and refuge all at once! If you use durable VB Fishpond rubber sheeting, the pond will be laid out well for a long time.

A plunge into the pond

Swimming in a natural pond is the latest fashion. If you lay your pond with VB Fishpond rubber sheeting, you can have fun in the water for years. The elasticity of this exclusive top-quality rubber sheeting gives it an exceptionally long lifetime. As the material is not sensitive to UV radiation and does not contain softeners, the sheeting will remain supple and elastic. Another significant benefit is that VB Fishpond rubber sheeting is kind to the environment. For that reason, it is being used increasingly by garden specialists. It is suitable for any pond, in any shape that fits in with your garden.

Your fish are also very happy

In a pond with VB Fishpond rubber sheeting, every fish feels at home!

Constructing a pond for fish seems simple. When there are no plants, people think a container of water in the garden will do. Nothing is further from the truth. Correct water circulation, depth and water quality contribute to healthy fish. The exclusive pre-fabrication of the VB Fishpond rubber sheeting means that your fish can play all the tricks they like...no seams will give way. The rubber sheeting is exceptionally strong due to the homogeneous seam of pure EPDM rubber. In other words, the seam is at least as strong as the VB Fishpond rubber sheeting itself.

VB Fishpond is part of the VB-EPDM product line. EPDM rubber sheeting is robust elastic rubber sheeting, strong enough to serve a wide variety of purposes. It is even used to seal flat roofs. EPDM rubber sheeting is weather-resistant and cracks are a thing of the past.
